

Ecologically friendly Wetting agent

Bio Foam—Additive for fire suppressing

The ultimate in biodegradability, made from natural renewable raw materials.

Areas of Application:

- Firefighting in forestry.
- Firefighting in Agriculture
- Aerial firefighting.
- Knapsack applications.

BIOTENSIDON-Bio Foam wetting agent is very efficient and economical, so that approximately only 20% of the previously required water quantity is needed, thanks to the reduced surface tension, the wetting agent soaks deeper into the substances and forms a film. Fires can thus be fought faster, with a smaller quantity of water. As a result, the extinguishing efficiency can be increased by 100%.

The disposal of Bio foam falls under the general waste regulations and no additional requirements is necessary.

Instructions for Use:

Shake well before use!

Add 100 ml per 100 litres of water. Apply using conventional firefighting equipment.

Biodegradation starts as soon as water is added therefore, it is advisable to use the mixture within 10 days of dilution.

Precautions:

Keep BIOTENSIDON-Bio Foam out of reach of children and uninformed persons.

Avoid contact with eyes, in case of contact with eyes, rinse out with clean water immediately.

Store above 1°C.
