

Ecologically friendly Bioremediation

Decontamination – Specially formulated for soil reclamation and decontamination.
The ultimate in biodegradability, made from natural renewable raw materials.

Areas of Application:

- Oil – track removal.
- Cleanup after accidental oil or fuel leakage
- Water bodies.
- Shore areas.
- Sewage treatment plants.

BIOTENSIDON'S Decontamination offers a cost effective, organic, and simple way of remediating degraded and contaminated soils, the removal of a wide range of harmful contaminants in soil, groundwater, and water bodies.

The disposal of BIOTENSIDON'S Decontamination falls under the general waste regulations and no additional requirements is necessary.

Application:

Shake well before use!

Spray BIOTENSIDON'S Decontamination onto the contaminated area, leave for 12 hours and repeat. depending on the temperature and degree of contamination.

Instructions for Use:

Due to the large number of possible influences and variances during the remediation process and differing soil compositions and substrates, trial processing should be carried out constantly by the user.

No dilution required, use as per application instructions.

Precautions:

Keep BIOTENSIDON'S Decontamination out of reach of children and uninformed persons.

Avoid contact with eyes, in case of contact with eyes, rinse out with clean water immediately.

If swallowed, seek medical assistance.

Store above 1°C.
